

specification environment

This is the abstract for the assignment. Here you state what the assignment is and provide any additional introduction or commentary that you care to.

### USED TO CALCULATE

This is how you can calculate the object throw away down on the speed and time.

This is a equation ,  
Is used to calculate throw object remove down  
on speed and time

### REPRESENTING PYTHON CODE IN YOUR ASSIGNMENT

```
a=-9.8
v0=3
y0=10
dt=0.1
t=0
v=v0
y=y0
while y>0:
    t=t+dt
    v=v+a*dt
    y=y+a*dt

print"time is"+str(t)
print"final velocity is"+str(v)
```

Here is a data to calculate.

the number is composite

This indicates the output of your program.
